

CLOSED LOOP CONVEYING

- ★ Ideal for hygroscopic materials, same air continually circulates thus avoiding the introduction of moist air
- ★ Sealed system means clean enclosed method of conveying
- ★ Hygienic – prevents bugs and micro organisms entering system – suitable for food quality powders and granules

No dust filters
No dumping of product off filter bags
Reduced product loss
Reduced cross contamination between batches
Consistent transfer rate & better accuracy
Emissions contained
Conveying in inert gas

Reduced Damaged For Friable Products By Maintaining Minimum Velocity

MAKING THE RIGHT IMPRESSION
