BIG BAG COMPACTORS

A simple and easy solution for the dust free handling and compacting of FIBC 'Big Bags'. Empty bags are placed into the feeder and when the lid is closed a heavy duty compacting screw with decreasing pitch draws the bag in and compacts it.

The screw feeds the compacted bag into another big bag (the press sack) which can hold up to 80 compacted big bags.

Features

Robust design

Easy to install

Up to 80 compacted bags into one press sack

120 bags per hour capacity

Noise level < 68 dbA

Universal design which allows all sizes of bags to be compacted

3 Kw drive

Painted mild steel or stainless steel construction.
